SILAGE SUPPLIES TECHNICAL FACT SHEET

PASSION FILM - WHITE ON BLACK

Silage cover

Oxygen barrier (OB) protection and familiarity of traditional plastic.

It's durable as a stand-alone product without protective cover, and the white top surface keeps the silage cooler.

- 200um (micron) strength will not tear when installing
- white surface reflects UV rays to keep the stack from
- black underlayer helps prevent oxygen transfer and to preserve the silage

Passion White on Black can be used either with the Passion Yellow oxygen barrier underneath or as a standalone silage cover. Using the Passion White on Black cover to protect your silage will help to reduce dry matter losses, nutrient losses, aerobic spoilage and to increase the stability of the face at feed out.

Storage and handling

- Store in dark, cool, dry conditions
- Store out of sunlight and in the original packaging
- · Any opened and unused product should be protected from sunlight and stored for future use
- · Suitable for recycling

Technical data

High strength and high anti UV agricultural silage cover. LDPE white on black, wide range of sizes available.
