

# Canola – Technical fact sheet

Clearfield® Hybrid

## 43Y92CL

**Proven returns in regions with low to medium rainfall contribute to effective risk management strategies.**

Displays exceptional adaptability and yield for maturity.

This hybrid demonstrates robust yields under stress induced environments, assisting in risk management in low to medium rainfall environments.

Exceptional early growth helps to deliver effective weed control results through superior crop competition and early canopy closure.

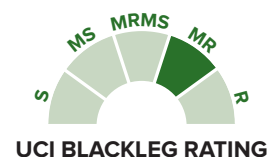

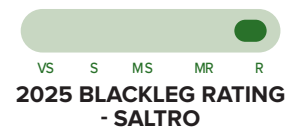

### Agronomic positioning

- Early maturity hybrid
- Suited to LRF regions
- Later sowing in MRF areas

### Key features

- Proven performer
- Strong agronomic package
- Earliest Clearfield® Hybrid

### Trait ratings

Pioneer® brand seeds are produced and distributed in Australia by GenTech Seeds, a Yates Family Business
