Canola – Technical fact sheet

Triazine Tolerant Hybrid

PY432T **NEW**

The next generation of hyper yielding Triazine Tolerant canola bred from our elite Pioneer genetic pipeline.

YIELD is what comes to mind with this exciting new Y Series® Hybrid.

This hybrid delivers exceptionally high yield in the early mid maturity Triazine Tolerant segment, with a strong agronomic package.

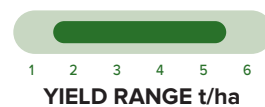

Agronomic positioning

- Early mid maturity – RM4
- Mid fast phenology
- Suited to MRF environments

Key features

- Extremely high yielding
- Triazine Tolerant
- Strong agronomic package
