Grain sorghum – Technical fact sheet

A88

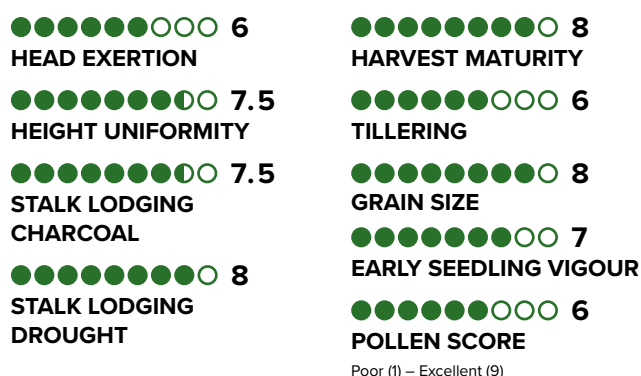

Get set to be impressed!

- Very good early vigour, setting the plant up for success throughout the season
- Impressive standability in drought conditions
- Excellent grain size with an appealing grain colour at maturity
- Impressive dry down brings the crop into harvest moisture quickly

A88 is a well-rounded hybrid best suited to an early or main season planting window. A88 can maximise yield in a high rainfall or irrigated farming system as well as provide reliability in tougher dryland conditions.
