

Summer forage – Technical fact sheet

Betta Graze

Sorghum x Sudan Grass hybrid

First to plant, first to feed.

- First to plant for early summer feed due to it's early seedling vigour
- Small diameter stems suits grazing by many livestock types, and hay and round bale silage
- Known for robust regrowth and getting more leafy feed sooner after grazing or cutting
- Has a high leaf to stem ratio delivers a greater volume of feed at all plant heights, especially less than 1 m

Betta Graze has excellent regrowth after grazing or cutting, partnered with impressive early seedling vigour it can be sown early and grazed quickly by any type of livestock. Betta Graze is highly palatable and is highly suited to general grazing, hay production and round bale silage.
