

Canola – Technical fact sheet

Roundup Ready® Hybrid

PY428R

A new hyper-yielding Roundup Ready® hybrid with early to mid maturity and a broad adaptability across a wide range of regions.

Introducing a new hyper-yielding Roundup Ready® hybrid with early to mid-maturity and a broad adaptability across a wide range of regions.

This hybrid showcases the highest in-field performance ever witnessed at Pioneer, elevating early to mid glyphosate tolerance hybrid performance to unprecedented levels. It exhibits genuine early to mid-phenology and maturity, making it well-suited for diverse environments and conditions.

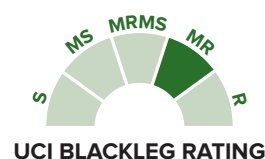

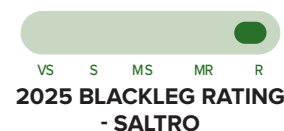

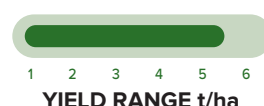

Agronomic positioning

- Early-mid maturity
- Mid-fast phenology
- Ideally suited to MRF or late sowing in HRF

Key features

- Very high yielding
- Tight flowering window
- Quick to mature

Trait ratings

Pioneer® brand seeds are produced and distributed in Australia by GenTech Seeds, a Yates Family Business
