## Canola – Technical fact sheet

**IMI Tolerant Hybrid**

# 44Y94CL

### The benchmark hybrid in the early-mid season IMI Tolerant segment.

This Y Series® Hybrid offers an impressive package of agronomic traits and performance.

Excellent early season growth coupled with outstanding yield and oil potential delivers greater returns per hectare.

Reliable performance has resulted in this hybrid being one of the widely grown canola hybrids on the market.

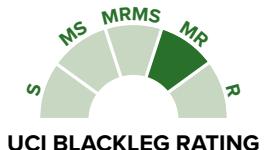

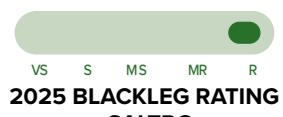

### Agronomic positioning

- Early-mid maturity hybrid suited to a wide range of environments
- Early sowing in LRF
- Later sowing in HRF regions

### Key features

- Very high yielding
- Proven resilience
- Strong agronomic package

### Trait ratings

Poor (1) – Excellent (9)
