GRAZE N SILE

Pioneer® brand Forage Sorghum performance information

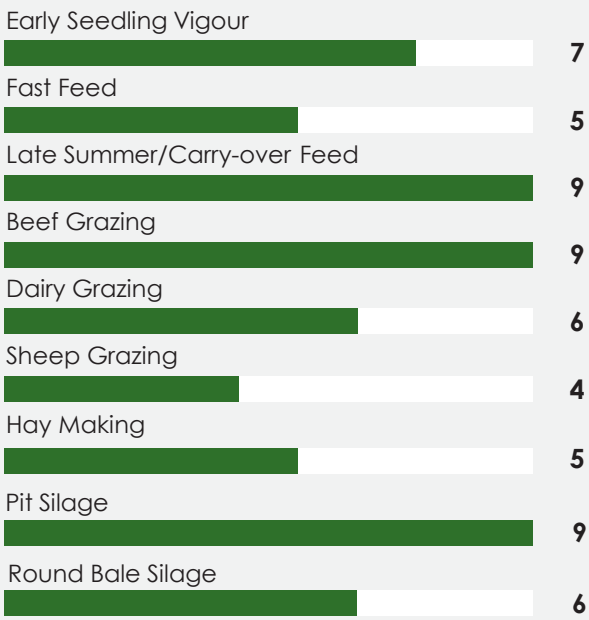

Forage Type: Sorghum x Sorghum Hybrid

The best choice for pit silage production.

- A water-efficient hybrid delivering silage quality comparable to corn silage.
- High white grain content produces proven, high metabolizable energy silage for meat and milk systems.
- Good leaf disease resistance for better silage quality and yield.
- Regrows after cutting, meaning it can be cut a second time or grazed.
- Greater tolerance to Fall Armyworm than corn, with improved control due to Graze-N-Sile's open head

Graze N Sile is a tall, grain-bearing forage sorghum designed to deliver high yields of energy-dense silage. It is an excellent alternative to corn silage in dryland or limited irrigation environments.

Plant and Agronomic Traits

Recommended Sowing Rates (kg/ha)

Low rainfall dryland	Good rainfall dryland	High rainfall dryland & irrigation
2 – 3	3 - 5	5 - 6

Maturity & End Use
