MEGA FEED

Pioneer® brand Forage Sorghum performance information

Forage Type: Sorghum x Sudan Hybrid

An ultra-late all-rounder.

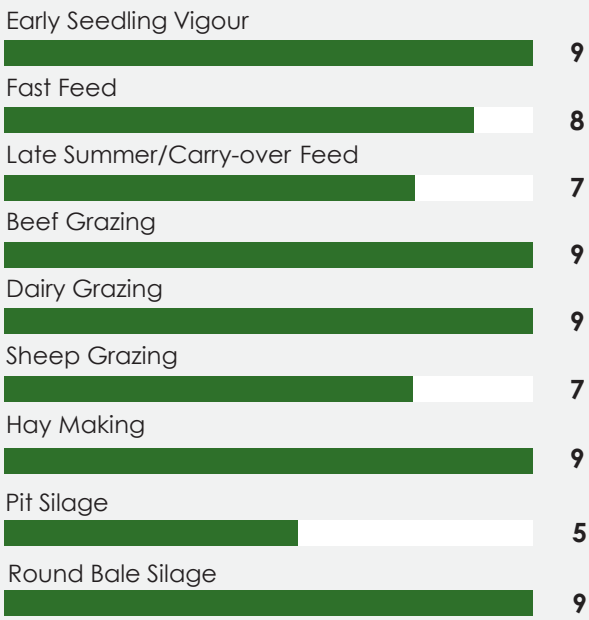

- Ultra-late maturity (120 days+ to flower), maintains high-quality and biomass late into the season.
- Flexible and adaptable all-rounder hybrid that is well-suited to grazing, baling or silage.
- Excellent early vigour, giving the option to sow early and extend the growing period.
- High leaf to stem ratio for increased palatability and quality yield.
- High sugar content and energy availability in the leaf and stem convert dry matter into liveweight and milk production.

Mega Feed is suited to most situations; with its ultra-late maturity, it retains its high-quality feed later than anything else. Its combination of early vigour and very late maturity can help to reduce spring feed gaps while maintaining production late into the season. Mega Feed is an excellent option for almost all forage situations.

Recommended Sowing Rates (kg/ha)

Low rainfall dryland	Good rainfall dryland	High rainfall dryland & irrigation
2 - 3	3 - 10	10 - 15
