# P1756

## Pioneer® brand Corn performance information

**Well-known grain quality leader.**

Uniquely bred in Australia for the Australian corn processing market and the Asian export markets.

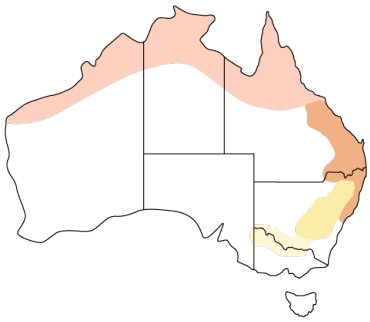

- Superior husk cover and cob rot resistance, protecting grain quality as the crop matures
- Consistent, high performance in all full season growing environments
- Flexible end use with high grain yields, solid silage production and top quality processing grain

**P1756** exhibits excellent stalk strength and is suited to both dryland and irrigation areas.
