Pioneer® brand Corn performance information

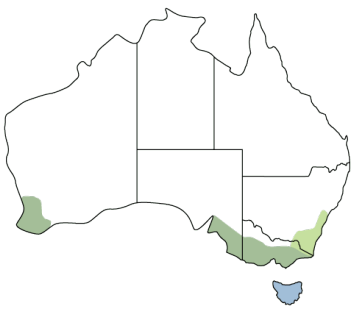

Solid, balanced hybrid with top-of-the-line foliar health.

Plant where Northern Leaf Blight, standability and drought tolerance are seasonal concerns.

- Strong silage production with high grain content for maximum quality.
- Moderately tall with strong agronomics, superior root and stalk strength.
- Combines excellent drought tolerance and foliar health to deliver high and stable silage yields.
- Late-season plant health delivers a wide harvest window and silage with exceptional digestibility and energy.

First choice in southern Victoria, where plant health and yield are a priority.
