P1837

Pioneer® brand Maize performance information

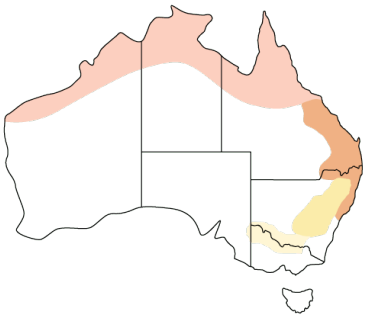

Defensive, reliable, full-season competitor.

Superior standability and solid resistance to Northern Leaf Blight and Rust.

- Excellent drought tolerance and late-season plant health, which support season-long silage appeal.
- Has better foliar health than P1756 while being slightly later in maturity.
- P1837 is well adapted to a range of populations, suitable for dryland and irrigated situations.

A widely adapted, stable, full-season hybrid. Plant early in high-potential paddocks in warm production areas. Companion for **P1729** or switch to **P17822 IT** for silage, where Imidazolinone herbicide is required.
