

## TECHNICAL FACT SHEET

# Mega Sweet

SCAN FOR  
MORE INFO

### The Flexible Forage Sorghum.

Mega Sweet is attractive to stock at any stage of growth and increases its feed value and sweetness as it matures. Mega Sweet can be planted early in the season, mid season or late season for late Summer and carry-over feed. Mega Sweet can be used for grazing or quality silage production but should be your first choice for grazing cattle. It is especially suited to beef enterprises and can give exceptional weight gains.

### Key Features

- Flexible grazing option especially for beef, providing standover feed late in the season
- High energy stover and white grain delivers high Metabolisable Energy for conversion to meat or milk, especially with pit silage.
- Provides more feed for longer, or more cuts of silage, due to it's strong regrowth capability. Mega Sweet delivers the biggest biomass yield over the life of the crop to feed more stock.
- Known to be highly sweet and palatable delivering improved utilisation in the field and in the feed trough
